# PHILIPS

## Highlights

### GentleTrack Precision Blades

The newly designed blades comfortably cut hairs in the most optimal cutting position, thereby reducing irritation caused by tugging and pulling.

### Super Lift & Cut Action

The dual blade system built into our electric shaver lifts hairs to cut comfortably below skin level for a closer shaving experience.

### Replacement reminder

The latest Philips shavers have an inbuilt replacement reminder in the form of a shaving unit symbol. This symbol will light up and indicate you when to replace shaving heads.

### Simple replacement

1. Open the shaver by pressing the "release" button; 2. Remove the retainer by turning the lock counterclockwise; 3. Take out the old shaving heads and carefully insert replacements; check that the heads align exactly in the setting; 4. Replace the retainer and secure it by turning the lock clockwise; 5. When you close the shaving head properly, you will hear it click into place.

### How to reset your shaver

After replacing shaving heads, you can reset the replacement reminder by pressing the on/off button for more than 7 seconds. Otherwise, replacement trigger will turn off automatically after 9 successive shaves.

### Reset your shaver to new

To get back to 100% performance, replace your shaving heads every 12 months.

## Specifications

### Shaving heads
